What skills do students need to “pull apart” the existing knowledge to look at it critically and judge it?

What skills do students need to combine and build on existing knowledge to produce something new?

What is the foundational knowledge and skills that students should remember and comprehend in this course?

- Assess, analyze, compare, contrast, prioritize, deconstruct, classify, justify, infer, distinguish, appraise, critique
- Compose, design, solve, argue, generate, construct, develop, hypothesize, invent, formulate
- Explain, demonstrate, identify, recite, reproduce, recognize, define, label, match, convert, translate

**ANALYZE & EVALUATE**

**SYNTHESIZE & CREATE**

**KNOW**
